

The Crane

Volume 55 Number 4 March-April 2014

March and April Field Trips

Saturday, March 1, 8 am; Mill Creek—CLEP*

In 2002, the Alachua County Forever program made its first conservation land purchase—the 1,190 acre Mill Creek Preserve. Meet leader Steve Hofstetter at the parking lot of Hitchcock's Grocery Store in Alachua on the south side of US 441, and carpool to Mill Creek Preserve to bird through the pine and hardwood forests. Difficulty: 2

Saturday, March 1, 9:00 am Family Birding at Paynes Prairie

Attracting Birds to your Backyard. Meet Neil and Joan MacLeod at the Lake Wauberg boat ramp at Paynes Prairie Preserve State Park. This field trip is sponsored by the state park. Call 352-466-4100 to register. Families and kids are encouraged to participate.

Saturday, March 15, 8:00 a.m. - Wildflowers with Dana Griffin; Meet retired UF botany professor Dana Griffin at the Sweetbay parking lot at the corner of SW 20th Avenue and SW 34th St. Dr. Griffin will lead a caravan to several locations near Gainesville where the wildflowers are at their best. Dr. Griffin's "Local Flora" class was legendary and you'll get to find out why without paying tuition or taking tests. Diff.2

Saturday, March 29, 8:00 a.m.-Morningside Nature Center – CLEP*; Meet City Naturalist Geoff Parks at the Morningside parking lot. MNC contains more than seven miles of trails that wind through sandhills, flatwoods, cypress domes, and habitat restoration areas. We might see newly-arrived Summer Tan-

agers and Great Crested Flycatchers, but the resident breeders – Pine Warblers, Eastern Towhees, Brown-headed Nuthatches, and Red-headed Woodpeckers - should be busy singing and building nests. Difficulty: 2

Saturday, April 5, 7:30 a.m.-Ocala National Forest; Meet trip leader Bob Simons in the Sweetbay parking lot at the corner of SW 20th Avenue and SW 34th Street. Bob knows pine forests better than almost anyone, and he's a great guide to the longleaf sandhills and scrub of this marvelous 383,000-acre remnant of aboriginal Florida. Birdwise, we'll hope to see Florida Scrub-Jay, Red-cockaded Woodpecker, Bachman's Sparrow, and Swallow-tailed Kite. Difficulty: 3

Saturday, April 12, 7:30 a.m.—Prairie Creek Preserve—CLEP* Meet trip leader Ivor Kincaid at Powers Park parking lot and then drive to Prairie Creek Preserve. Ivor is the land manager for the Alachua Conservation Trust. We'll walk the trails through upland oak woods, swampy edges, and the borders of Prairie Creek, looking for such neotropical migrants as Prothonotary Warbler, Northern Parula, Yellow-throated Warbler, and Blue Grosbeak. Difficulty: 2

Sunday, April 13, 7:30 a.m.- San Felasco Hammock (Progress Center); Meet trip leader Mike Meisenburg at the Tag Agency and carpool to San Felasco Hammock Progress Park (north) entrance near Alachua (\$4.00 per vehicle parking fee). Alachua Audubon spearheaded the effort to buy San Felasco Hammock in 1974 and (*Fieldtrips continued on Page 5*)

Trip Difficulty 1: Trip within easy access to the vehicle and/or level terrain one mile or less **2:** May involve uneven terrain one to two miles **3:** May involve elevation change, uneven terrain, and/or greater than two miles

**Deadline for
May-June Crane:
Apr. 15th**

This was one of the most exciting winters for birding in recent memory. While lacking in such seasonal delights as Dark-eyed Junco, Brown Creeper, and Winter Wren, we more than made up for it with a startling array of rare and beautiful avian treats.

Just before the Christmas Bird Count, there was a report from a non-birder about a possible Swainson's Hawk near Archer. A contingent of Gainesville birders checked it out and sure enough, after an hours wait an immature Swainson's Hawk, our third-ever, sailed right by us. On January 4 the Goodman family discovered a stunning male Bullock's Oriole among the Baltimore Orioles visiting their feeding station. Only the fourth of this species ever recorded here, his rarity and good looks earned him celebrity-bird status, including a spot on TV20 news! Then on January 14 Rex Rowan and I were birding the Hague Dairy and got a call from Bubba Scales to check a possible Calliope Hummingbird in High Springs. We found a drop-dead gorgeous adult male Calliope Hummingbird in the yard of Jack and Mary Lynch, our third Calliope ever and the first male of that species recorded here. Incredibly, within a few days a female Rufous Hummingbird and a Western Tanager were also discovered in the Lynch's yard. On the weekend of January 18-19 expert hummingbird bander Fred Bassett made a special trip to Alachua County and in two days banded 14 wintering hummers, including eight Rufous, three Ruby-throated, one Black-chinned (in the yard of Hilda Bellot), and TWO Calliopes (the second was in the yard of Ellen and Allen Shapiro). In the meantime, the Rusty Blackbird flock continued to be seen at Magnolia Parke, and at La Chua trail a somewhat reliable White-faced Ibis appeared along with the ever-reliable Vermilion Flycatcher, plus two Wilson's Warblers and three Yellow-breasted Chats down the side trail known as "Sparrow Alley". Chris Burney discovered both Henslow's and Fox Sparrows at Prairie Creek Lodge; just before the month ended Lloyd Davis alerted us to the presence of a Clay-colored Sparrow plus a mother lode of Painted Buntings at the Hague Dairy (as many as seven!), and Bubba and Ingrid Scales found a Pine Siskin visiting their feeders. Needless to say, all these birds were keeping Gainesville area birders fairly breathless; they were also getting the attention of out-of-town birders and big-time listers from across the state, who began streaming into town by the dozens to feast their eyes on our avian cornucopia. Many a county, state, and life bird was checked off here in January. A big "thank you" from the entire birding community goes out to the Goodman, Bellot, Shapiro, and Scales families and Jack and Mary Lynch for their stewardship in hosting these amazing birds and for their gracious

hospitality in allowing so many a chance to enjoy them.

Seeking some respite from the frenzied land birding, John Hintermister, Rex Rowan, and I conducted our annual boat survey of Lake Santa Fe on February 6. Of interest was a much larger than usual concentration of Horned Grebes, but nothing else out of the ordinary...until we spotted a raft of several Common Loons. We motored in for a closer look and discovered one was a Pacific Loon! This was the second ever in the county and only second inland record in the state. The first was one we found on Lake Santa Fe the previous year. This was likely the same bird, returned for the winter. Can the rest of the winter get any better than this? *Probably* not. But that's OK. I'm ready for spring migration! Thanks to those who shared their sightings through February 10, 2014.

Gainesville “Old Florida” Birding and Nature Festival; April 18—20 *Open for Registration*

The first annual Gainesville “Old Florida” Birding and Nature Festival will be held April 18—20 at the downtown Gainesville Hampton Inn. The festival will showcase Gainesville and north central Florida’s unique natural areas, including nearby springs, rivers, and Alachua Sink at Paynes Prairie Preserve State Park. Guided birding field trips and nature photography field workshops will be offered.

For more information or to register, please visit [www. GainesvilleBirdingandNatureFestival.com](http://www.GainesvilleBirdingandNatureFestival.com), like us on Facebook at Gainesville-BirdingAndNatureFestival, and follow us on Twitter at GvilleBirdFest.

Rarities Abound on AAS Field Trip

On Saturday, February 15th, 11 hardy souls convened, with John Hintermister at the helm, to bird the northeast Atlantic coast. We spent the first 2.5 hours in a howling wind in frigid (for Florida) temperatures on the pier at Fort Clinch State Park. It was all very well worth it, however--among the day's splendid finds were a very cooperative Purple Sandpiper (thank you, Pat Burns!) sitting right next to an equally cooperative Ruddy Turnstone, to which we were able to compare size, color, beak, and streaking of both birds. John pointed out an Iceland and Glaucous Gull sitting on the beach among a large group of gulls and turns. These two unusual gulls are most commonly found off the coasts of Maine and the Canadian Maritimes. They also posed patiently while we admired their unusual ivory coloration--both are white-winged gulls, neither having black tips to their wings as do all the gulls we see regularly off the Florida coastline. We also saw several fine Black Scoters from the pier. We then moved to the west side of the Fort where Barbara Shea discovered a White-winged Scoter, the highlight of that stop.

From Fort Clinch we traveled to Amelia Island State Park, where the exciting finds were a Parasitic Jaeger and two Red-throated Loons. At both Fort Clinch and Amelia Island SP we watched a good number of Northern Gannets as they performed their spectacular plunges.

Our final stop was at Huguenot Park, in search of the Snow Buntings that had been seen there previously this year. We weren't able to scare them up, but we did manage to see a Horned Grebe, Red-breasted Merganser, Red Knots, Dunlins, and Semipalmated Plovers. Truly a wonderfully field trip, great leader, and life birds added to our lists!

By Sidney Wade

Boys, Birds, and Binoculars—Recount of AAS Kids' CBC

On Saturday, January 18th, a dozen hopeful birders set out on La Chua Trail just after 9:00 a.m. on a cold but sunny morning. Immediately as we began our walk along the trail, the first unusual sighting of the day occurred. One of the more experienced birders saw an Ovenbird, which is usually found here in the fall but rare in the winter. This small bird stays low to the ground and has an amusing characteristic walk, not hopping like most birds but walking like a person.

As we continued, one enthusiast played the White-throated Sparrow song on an MP3 to see if any birds would answer back, and sure enough a sparrow replied, singing a sweet little song. At the prairie we were met by many little birds in the grass, in the air, and perching on trees. We started walking slowly towards the water, counting birds and marking the count on our tally sheet.

One person called out, “two bald eagles, eleven o'clock right over Alachua Sink. Looks like an adult and a juvenile.” I, Kennedy, put my binoculars to my eyes and saw the familiar glossy-black body with white head and tail feathers soaring silently, probably searching for small mammals. The pair hit an updraft and ascended rapidly, high enough that my binoculars were not of much use. The duo continued to soar, scouring the prairie for their meal.

We continued along the canal that flows into the sink and paused to view Pied-billed Grebes, Anhingas, Great Blue and Little Blue Herons, and Belted Kingfishers. One Anhinga was fishing underwater in the shallows close to the bank so that we could see the bird periodically darting past. One had stabbed a fish and swallowed it underwater! I, Kennedy, followed the Anhinga's underwater route by watching the periodic show of bubbles that arose along its submerged path. I was amazed to see how long Anhingas can stay underwater, far longer than I can!

At the water's edge there were about five or six Pied-billed Grebes swimming or diving in the water. We stayed to watch some grebes chasing each other-- half running, half swimming-- across the surface of the water. After a time, we moved on and stopped when we heard a harsh call made by a Common Grackle who flew overhead landing on a little bridge nearby. He had a huge tadpole with legs and a tail which he began to tear at, eating most of it before he let the carcass fall down into the water. On the trail we

passed a temporary orange fence which was set up to keep pedestrians away from the massive alligators on the bank. We were nervous passing them because we have heard, though fortunately never experienced, that gators can run very fast.

Nearby White Ibises caught my eye and I, Nathaniel, lowered my binoculars. But I brought them back up in a hurry. A small tan body with a long black-banded tail and dark streaks on its breast and legs zoomed by. It was a Sharp-shinned Hawk! I turned back to Steve, the team leader, who had seen it too. “Did you see that?” I exclaimed. “You bet! It was a Sharp-Shinned Hawk!” he returned. I had never before seen a Sharp-shinned Hawk, as this beautiful bird often stays down low in the shrubs and trees. What a find!

We turned back midday to join the other two groups that participated in the bird count. We all met at the Mill Pond club house where the cadre of participants, 15 adults and 15 children, enjoyed a pizza lunch while counting up the birds from north and south Paynes Prairie, Lake Alice, and High Springs. The final tally was 99 species and 2,516 birds. We are grateful to Alachua Audubon and the AAS volunteers—Adam Kent, Steve and Ted Goodman, Emily Schwartz, Sharon Kuchinski, Helen Warren, and Bubba Scales for making this unique experience available. And we are eager to participate in next year's Youth CBC!

Brothers, Nathaniel (age 13) and Kennedy (age 11) Kiker are home-schooled and enjoy the woods of southeast Gainesville where they have ample opportunity to enjoy the wildlife that share the land and sky.

Photo of Kennedy Kiker taken by Mindy Kiker during the Kids' CBC on Paynes Prairie.

Kanapaha Botanical Gardens Spring Garden Festival

The Alachua Audubon Society will sponsor an educational table at the upcoming Kanapaha Botanical Gardens Spring Garden Festival on March 22—23. ***We need helpers at our table to share with others our excitement for birds, conservation, and natural areas.*** You don't have to be a birding expert, just friendly and enthusiastic. Would you like to sign up for a 2 or 3-hour morning or afternoon shift on Saturday or Sunday? To sign up, please contact Felicia Lee at leeffa99@earthlink.net or Barbara Shea at acubarashea@juno.com.

Fieldtrips (continued from Page 1)

we're especially interested in showing everyone what a beautiful place it is. We'll follow a trail along Lee Pond and Cellon Creek, looking for woodland-nesting species and spring migrants. Difficulty: 3

Saturday, April 19 8:00 a.m. Powers Park and Palm Point; Meet trip leader Bob Carroll at Powers Park to check for birds in the trees along the boat channel and scan the lake from the fishing pier. Then travel to nearby Palm Point – a local migrant trap – to search for migrant activity. Diff. 1.

Sunday, April 20, 6:30 a.m.-Cedar Key; Meet trip leader Rex Rowan in the Target parking lot on Archer Road at I-75. The emphasis on this trip will be migrants – mainly warblers and shorebirds. We'll also look for some uncommon and/or coastal nesting species: Gray Kingbird, Swallow-tailed Kite, and possibly Short-tailed Hawk. Some people stick around after the trip for lunch. Difficulty: 2

Saturday, April 26, 6:00 a.m. Hickory Mound WMA and Surrounding Area; Meet trip leader

John Hintermister at the Tag Agency on SW 34th St. across from the new Walmart to carpool. We will spend most of the day exploring this wonderful mix of salt and freshwater marshes and coastal hardwood swamps. We hope to see spring migrants plus the local nesters—Swainson's Warbler, Prothonotary Warbler, Short-tailed Hawk, Acadian Flycatcher, Seaside Sparrow, King and Clapper Rails, and others. Bring a lunch, water, and bug repellent.

Sunday, April 27, 8:00 a.m.-San Felasco Hammock (south entrance); Meet trip leader Adam Kent at San Felasco's Millhopper Road parking lot (\$4.00 per vehicle parking fee). Sandhills, meandering streams, forested slopes, and sinkholes set the stage for the diversity of birds we hope to find, such as Yellow-throated and Red-eyed Vireos, Hooded Warbler, Acadian Flycatcher, and the locally-rare Wood Thrush. Difficulty: 2

Saturday, May 3, 6:30 a.m. Florida East Coast Meet field trip leader, John Hintermister, at the Powers Park parking lot. We will explore St. Johns, Flagler, and maybe northern Volusia County. This is a good time for migrant songbirds and shorebirds and they will be in breeding plumage. This will be a full day field trip but you have the option to leave at anytime. Bring a lunch, water, sunscreen, and bug repellent.

Sunday, May 4, 8:00 a.m., La Chua Trail, Meet trip leaders Neil and Joan McLeod at the trailhead on Camp Ranch Road to search for Yellow-breasted Chat, Indigo Bunting, Blue Grosbeak, and other prairie-dwelling birds.

**The Conservation Lands Educational Program (CLEP) is designed to bring attention to local land conservation efforts. These trips are conducted on properties purchased to protect natural resources and will be led by a representative who will discuss ecological features and history. CLEP trips will be educational experiences, so the emphasis will be on much more than birding.*

Speakers' Corner, Family Birding, and Events

Mark your calendar now for these exciting upcoming events!

Wednesday, May 21, Social at 6:30 p.m. and program at 7 p.m. Millhopper Library at 3145 NW 43rd St. Tracking Manatees in Florida: From Individuals to Populations. Presented by Dr. Chip Deutsch. The Florida manatee is one of the best-studied marine mammals in the world, and yet many mysteries remain. Chip Deutsch has studied the manatee for 20 years and will discuss their unique biology and conservation issues. Special focus will be on what we've learned about their movements and behavior through tracking via satellite.

Wednesday, June 18, 2014 – Millhopper Library Social at 6:30 p.m. and program at 7 p.m. Tracking Birds: The Latest Technology and the Amazing Things We Can Learn. Presented by Gina Kent of Avian Research and Conservation Institute. Learn about different ways to track wild birds from color bands to VHF and satellite telemetry. Gina will share her experience from her work with many different avian species found in the southeastern U.S. and how telemetry data has answered many questions on the life history of these birds.

Binoculars for Sling Shots

One of the many amazing things about Nicaragua is its abundant biodiversity, which is particularly rich in a small region called the Paso del Istmo in SW Nicaragua. The personality-rich, Yellow-naped Amazon parrot and the colorful Painted Bunting are two iconic species in the region. However these and other birds are threatened daily by slingshots. Unfortunately, it is common for local youths in rural areas to shoot birds with slingshots for sport.

In order to try and deter this destructive pastime, we launched a pilot program called *Binoculars for Slingshots*, in which we exchanged

Binoculars for Sling Shots (continued)

over 200 slingshots for shiny new binoculars as part of a larger environmental education program. Paso Pacifico wants to educate the next generation of eco-stewards and put more binoculars in the hands of more kids, but **we need your help.**

We have partnered with Optics for the Tropics who is giving us a substantial discount on the price of the binoculars, but taking this equipment through customs and into Nicaragua is pricey. The total cost of one pair of quality binoculars is \$100. Any amount you can give will contribute greatly toward our goal of purchasing 100 binoculars for the kids. Please partner with us to get binoculars in the hands of these kids and **join us as we foster in a new generation of bird lovers!**

Paso Pacifico is a 501(c)3 non-profit organization founded in 2005. Our mission is to restore and conserve the natural ecosystems of Central America's Pacific slope by collaborating with landowners, local communities and involved organizations to promote ecosystem conservation. We would like to thank Optics for the Tropics for providing matching funds to enable us to buy binoculars. Please help us leverage these great contributions by backing this project today! Visit www.indiegogo.com/projects/binoculars-for-slingshots/x/6325122

Kestrel Boxes at Watermelon Pond

On February 7th, Rex Rowan, Bob Simons, Ramesh Buch, and Susanna Hetrick installed eight Southeastern American Kestrel nest boxes and five Eastern Bluebird nest boxes on Alachua County property on the east side of Watermelon Pond. Ramesh braved the ladder and installed most of the kestrel boxes. It was a cold and somewhat windy day, but we enjoyed our time on this public land. We saw two fox squirrels and several interesting birds, including several kestrels.

The public lands around Watermelon Pond protect Alachua County's largest area of longleaf pine/turkey oak sandhill habitat and the county's largest populations of several wildlife species, including kestrels, fox squirrels, gopher tortoises, gopher frogs, and striped newts. In order to maintain and expand the population of Southeastern American Kestrels there, Alachua Audubon previously installed 29 kestrel boxes on nearby public lands over the past several years, including 16 nest boxes on the Florida Division of Forestry lands on the west and south sides of the Watermelon pond, five on the Florida Fish and Wildlife Conservation Commission lands on the north side, and now eight on county land on the east side.

These nest boxes help kestrels by providing the cavities they require for nesting. Due to the elimination of the virgin stands of longleaf pine that originally provided these cavities, the availability of cavities for nesting is a limiting factor for kestrels. The boxes are also used for nesting by Eastern Screech Owls, Great-crested Flycatchers, Northern Flickers, and flying squirrels. Fox squirrels will also occasionally use the nest boxes.

By Bob Simons

Birding Class Offered

Would you like to learn more about bird identification? SFC's Community Education Program, in collaboration with the Alachua Audubon Society, is offering a 4-week course in Field Bird Identification. Classes will be on April 5, 12, 26, and May 3rd. Classes are on Saturday mornings and last two hours. The final class will be a longer trip to Cedar Key. Each class is led by a local birding expert.

The course costs \$49 and generates revenue for AAS. Registration is through SFC. For more information and registration, go online to Santa Fe College Community Education or call (352) 395-5193. Registration for the class begins on March 19th. Class is limited to 12 students so register early as this class fills quickly. Hope to see you in class.

By Barbara Fennelly, Class Coordinator

Howard Adams, long-time AAS member and a coordinator of the Gainesville CBC, is retiring after 36 years with the FL Park Service. We wish Howard many happy days on the birding trail as he hangs up his Paynes Prairie park uniform one last time.

From Birds to Butterflies North American Butterfly Association—Local Activities

Meeting: Monday, March 10th. "Butterflies of India" at 7 p.m. at the Milhopper Public Library.

Field trip: Saturday, March 15th. "Henry's Elfin of Cow Creek Road, Goethe State Forest"

Field trip: Saturday, March 22nd. "Frosted Elfin of Simmons State Forest"

Butterfly Count, Saturday, May 3rd. Beginners Welcome.

AAS Hosted Backyard Birding Tour

Alachua Audubon Society hosted its third Backyard Birding Tour on February 8, 2014 on what began as an inauspicious cold, wet, and dreary morning. However, despite the weather, a number of hardy, water-proofed souls were out on the paved trail promptly at 9 a.m., following a self-guided tour around Gainesville. Within an hour after the tour's start, the rain began to fizzle and by noon the sun reemerged, along with rain-chilled and ravenous birds. The weather provided a near perfect storm of bird-friendly conditions in the realm of the backyard birder!

Beautiful birds are almost always nearby and can be drawn into one's own backyard with a minimal investment and in the comfort of one's own home. A large estate is never required to draw in a beautiful array of birds, just a little cover, some water, and supplemental feed. Properties on the tour ranged in size from a city-sized lot to multiple acres of land. Regardless of lot size, beautiful and unusual birds were nearby at every site on the tour.

Over 250 people purchased tickets for the tour. Each of the six featured properties offered a personalized design for attracting birds and an individual charm for attracting people. The home sites presented were a Duck Pond Victorian, a suburban mid-century modern home on the water front, a creekside home with a chef's kitchen, a vintage Cracker-style home under the trees, a cozy fire-warmed ranch with a wall of windows and a dining room full of cookies, and lastly a new solar-powered home teeming with birds as well as individually labeled and home-propagated landscape plantings.

The hosts generously invited tour goers onto their properties, offering coffee and snacks to help ward off the damp and bolster the spirits against the weather. As the sun came out, along with the birds, tour goers were blessed with views of a wide avian variety, from the predictable back yard denizens to a number of spring migrants, with the crowd favorite all-star Baltimore Orioles being present at many of the sites. Other birds drawn into feeding stations were Yellow-rumped Warblers, Yellow-throated Warblers, Palm Warblers, Northern Cardinals, American Goldfinches, House Finches, Blue Jays, Tufted Titmice, Northern Mockingbirds, Carolina Chickadees, Carolina Wrens, Chipping Sparrows, Red-bellied and Downy Woodpeckers, and an opportunistic dive bombing Cooper's Hawk, attracted by the presence of

the many smaller birds.

A unique experience of architecture and interior and exterior design was presented to visitors at each home, along with the homeowners who shared their hospitality, warmth and special formulas for drawing backyard birds into their world. To many tour goers, the take-home message was that backyard birding is a hobby that is inclusive to humans and birds alike. It is a comfortable, addicting, affordable, environmentally friendly hobby, which can intrigue beginners into developing a broader interest in birds and the environment in general.

By Elaine Robinson

AAS sincerely thanks the six families who so graciously shared their homes, yards, and bird-feeding techniques to over 250 participants. AAS also thanks the 29 volunteers who helped to make this event possible. And most of all, AAS recognizes Ron Robinson, who performed the lion's shares of the work, performing an untold number of tasks and attending to those details that are invariably inherent in an event this size.

Winners from the Backyard Tour

As part of the AAS Backyard Birding Tour, Wild Birds Unlimited donated multiple prizes that were awarded by random drawings. Following is a list of the prizes and their winners:

1. Vortex Diamondback 20-60 x 80mm angled spotting scope and Vortex Pro GT tripod - Harriet Sterns
2. Bird's Choice oriole feeder or Aspects hummingbird feeder - Tony and Lee Ross
3. Bird's Choice oriole feeder or Aspects hummingbird feeder (second) - Beth Kent
4. Tub of Jim's Birdacious Bark Butter - Janet Greene
5. Tub of Jim's Birdacious Bark Butter (second) - Nina Klingman
6. Wellspring designer lens cloth pouch - Anne-Marie and Billy
7. Wellspring designer lens cloth pouch (second) - Masuma Downie
8. Wellspring designer lens cloth pouch (third) - Mary Glazer
